Career Advice and Tips by Michael Laughter

What to do after the Career Fair

The GT Internship and Co-op Career Fair was almost held last week. Due to Snow Jam 2014 it was unfortunately cancelled half way through. The make – up date is Wednesday February 19th. If you were lucky enough to meet with a recruiter before we got snowed out here are some tips for you – and to use after the next fair. To ensure your success at the fair here are some additional tips:

- **Submit your resume** to employer websites and/or postings in CareerBuzz
- **Send a Thank You.** Most people at the job fair won't. Cite something specific from your interview: “I'm taking your advice about joining the student chapter of my professional organization.” This will help make you memorable.
- **Reflect** on your system, your execution, and your results. What might you have done more effectively? Make some initial plans for improvement before the next career fair.
- **Plan to follow up** with each recruiter about two weeks after the career fair. Contact them and express your continued interest with the organization, your assurance of your ability to contribute to the organization, and get more information about next steps in the process.
- **Consider developing some sort of system** for keeping track of all the recruiters and potential job leads.
- **Remember to find** other sources of job leads. Career fairs are a good source, but there are many other ways to generate job leads.

The Real Reason New College Grads Can’t Get Hired

It’s because college kids today can’t do math, one line of reasoning goes. Or they don’t know science. Or they’re clueless about technology, aside from their myriad social-media profiles. These are all good theories, but the problem with the unemployability of these young adults goes way beyond a lack of STEM skills. As it turns out, they can’t even show up on time in a button-down shirt and organize a team project.
